Summary

My research lies in the area of **galaxy evolution and formation** within astrophysics. My research area in particular is very programming/computationally heavy. I like describing my area of research as an **intersection between astronomy, statistics, and computer science**, specifically **machine learning and deep learning**. A lot of the work I have done and hope to continue doing heavily involves programming and using Python based algorithms. These algorithms have a heavy emphasis on machine learning and **artificial neural networks** to help answer research questions associated with galaxy evolution and formation.

Education

Tohoku University (東北大学)

PHD IN ASTRONOMY

- Supervisor: Prof. Masayuki Akiyama (秋山正幸教授)
- IGPAS Program

Sendai, Japan

Oct. 2022 - Apr. 2027

University of Toronto

HONS. BSc. IN ASTRONOMY AND PHYSICS

- Math minor and Philosophy minor

Toronto, Canada

Sept. 2017 - Jun. 2021

Research Experience

Tohoku University (東北大学)

GRADUATE STUDENT RESEARCHER

- Working on applying **machine learning and deep learning techniques** to problems in various areas of astronomy
- Primarily interested in extra-galactic astronomy
- Supervisor: Prof. Masayuki Akiyama (秋山正幸教授)

Sendai, Japan

Oct 2022- Present

University of Toronto

SURP RESEARCHER/ RESEARCH SCHOLAR

- Working on **training a convolutional neural network (CNN) to classify galaxies in the MaNGA survey**, while studying what features of the galaxies the neural network is focusing on to make the classification with the use of **CAM methods**.
- Network being created and trained using the **pytorch** Python package and working in a **Linux based environment** and using **Google Colab**
- Final goal is to have the CNN be able to predict the star forming history of the galaxies from their visual image and spectral information. Aim to **not only having a working CNN but to be able to pick it apart to understand how it is making decisions and extract relevant physics**
- Project Supervisor: Dr. Kathreik Iyer (Dunlap Institute)

Toronto, Canada

May 2021 - Sept 2022

University of Toronto

UNDERGRADUATE RESEARCHER

- Investigated morphological changes in galaxies as they evolve in time, by studying their internal kinematics using the MaNGA survey.
- Analysis being done using Python based code with **heavy use of machine learning algorithms such as DB scan and PCA** from the **sci-kit learn** library. Full write up of project can be found [here](#)
- **Unique use of PCA** which focused more on using the actual PC vectors rather than using them as the basis in a PC profile plot
- Project Supervisor: Dr. Mubdi Rahman (Dunlap Institute)

Toronto, Canada

Aug. 2020 - Apr. 2021

Presentations and Talks

East Asian Young Astronomers Meeting 2024

POSTER PRESENTATION

Chiang Mai, Thailand

Jan 30 - Feb 2, 2024

AI-Driven Discovery in Physics and Astrophysics

FLASH TALK PRESENTER

Kashiwa, Japan

Jan 22 - Jan 26, 2024

Machine Learning in Astronomical Surveys (IAP/CCA 2023)

POSTER PRESENTATION

Paris, France & New York, USA

Nov 27 - Dec 1, 2023

Resolving Universe

POSTER PRESENTATION

Tokyo, Japan

Nov 5-10, 2023

GPPU School

POSTER PRESENTATION

Sendai, Japan

Sept 28, 2023

Statistical Challenges in Modern Astronomy VIII

POSTER PRESENTATION

State College, USA

June 12-16, 2023

ART (Astrostats) Meeting

SEMINAR TALK

Toronto, Canada

Mar. 30, 2023

9th Galaxy Evolution Workshop

CONTRIBUTED TALK

Kyoto, Japan

Feb. 21, 2023

HSC-AGN Meeting 2022

CONTRIBUTED TALK

Kagoshima, Japan

Dec. 2, 2022

SDSS Collaboration Meeting 2021

PRESENTER IN DATA 1 SERIES AND LIGHTING TALK 1 SERIES

Baltimore, USA

Aug. 11, 2021

Awards

GPPU Applicant Travel Funding

POSTER PRESENTER

Chiang Mai, Thailand

Jan 29 - Feb 3, 2024

- Secured full travel and accommodation funding to present a poster at East Asia Young Astronomers Meeting 2024 hosted by NARIT (¥237,540)

AI-Driven Discovery in Physics and Astrophysics Travel Funding

WORKSHOP ATTENDEE & PRESENTER

Kashiwa, Japan

Jan 22 - Jan 26, 2024

- Secured full travel and accommodation funding to attend and present at an AI/ML x Physics/Astrophysics workshop at Kavli IPMU (¥50,000)

SUPER-IRNET Travel Funding

POSTER PRESENTER

Tokyo, Japan

Nov 5 - Nov 10, 2023

- Secured full travel and accommodation funding to present a poster at an ALMA and JWST conference at Waseda University. (¥76,940)

SUPER-IRNET Travel Funding

POSTER PRESENTER

State College, USA

June 4 - June 17, 2023

- Secured full travel and accommodation funding to attend an astrostats summer school and to do a poster presentation at an astrostats conference at Penn State. (¥734,525)

9th Galaxy Evolution Workshop Travel Funding

CONTRIBUTED TALK SPEAKER

Kyoto, Japan

Feb 19-25, 2023

- Secured full travel and accommodation funding from the conference (¥66,004)

HSC-AGN f2f Meeting Travel Funding

CONTRIBUTED TALK SPEAKER

Kagoshima, Japan

Nov 29-Dec 3, 2022

- Secured full travel and accommodation funding from the conference (¥98,623)

2022 Embassy Recommended Research MEXT Scholar

GRADUATE STUDENT

Sendai, Japan

Oct 2022 - Present

- The Japan Ministry of Education, Culture, Sports, Science and Technology (in Japanese: Monbukagakusho, English acronym: MEXT) offers scholarships to Canadian students wishing to pursue their studies at a Japanese university. For graduate studies (non-degree, masters or doctorate) in any university subjects. Scholarship provides: full tuition coverage, monthly allowance, round-trip between Canada and Japan, and Japanese language training. Information can be found [here](#) (≈ ¥5,100,000)

2021 SURP Top Poster Award

POSTER PRESENTER

Toronto, Canada

Aug 13, 2021

- Won top poster award for poster conference that was held to summarize all research projects carried out in the SURP program at the University of Toronto in the summer of 2021 (\$50)
